## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Claims 1-5 in the reply filed on 8/17/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 6-15 are pending in the application but are withdrawn for being drawn to a non-elected invention.

### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). ***Information Disclosure Statement***

The information disclosure statements filed on 7/18/03 and 10/2/06 have been placed in the application file and the information referred to therein has been considered as to the merits.

### ***Drawings***

The drawings received on 7/18/03 are acceptable for examination purposes.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The formulas, indicating derivatives of the respective basic

Art Unit: 1745

polymers, are indefinite because the linking site or polymerization site is not indicated.

It is unclear where each of the compounds would link together to form a polymer.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1 & 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,525,436 (Savinell).

Savinell discloses a proton conductive electrolyte having a basic polymer with an acidic group attached (Abstract; 2:50-65). The acidic group is more than  $3 \times 10^{-3}$  moles per gram of the polymer and the repeating unit has a mole unit greater than 0.10 the mole number of the acidic group (8:20-55).

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by US Publication 2002/0094466 (Kerres).

Kerres discloses an ion conductive composite membrane having a basic polymer and acidic groups attached (Abstract; [0002, 0017]). The basic polymer comprises polyanilines, polythiophene or polypyrrole and the acidic group is an  $\text{SO}_3\text{H}$  or  $\text{PO}_3\text{H}_2$

group ([0019-0020]). The repeating acidic group has the same chemical makeup as formulas (3) and (4) ([0030-0031]).
